

Business Intelligence and Analytics and Data Visualization for Efficient Business Management

**Some people will be using
Business Intelligence without
even knowing it.**

- Kurt Schlegel

What is Business Intelligence?

USED FOR

Business Intelligence is not just about turning data into information, rather organizations need that data to impact how their business operates and responds to the changing marketplace.

- Gerald Cohen

Why Business Intelligence?

Helps in defining growth strategies

Gaining insights from huge data sets

Better decision making leading to higher revenue

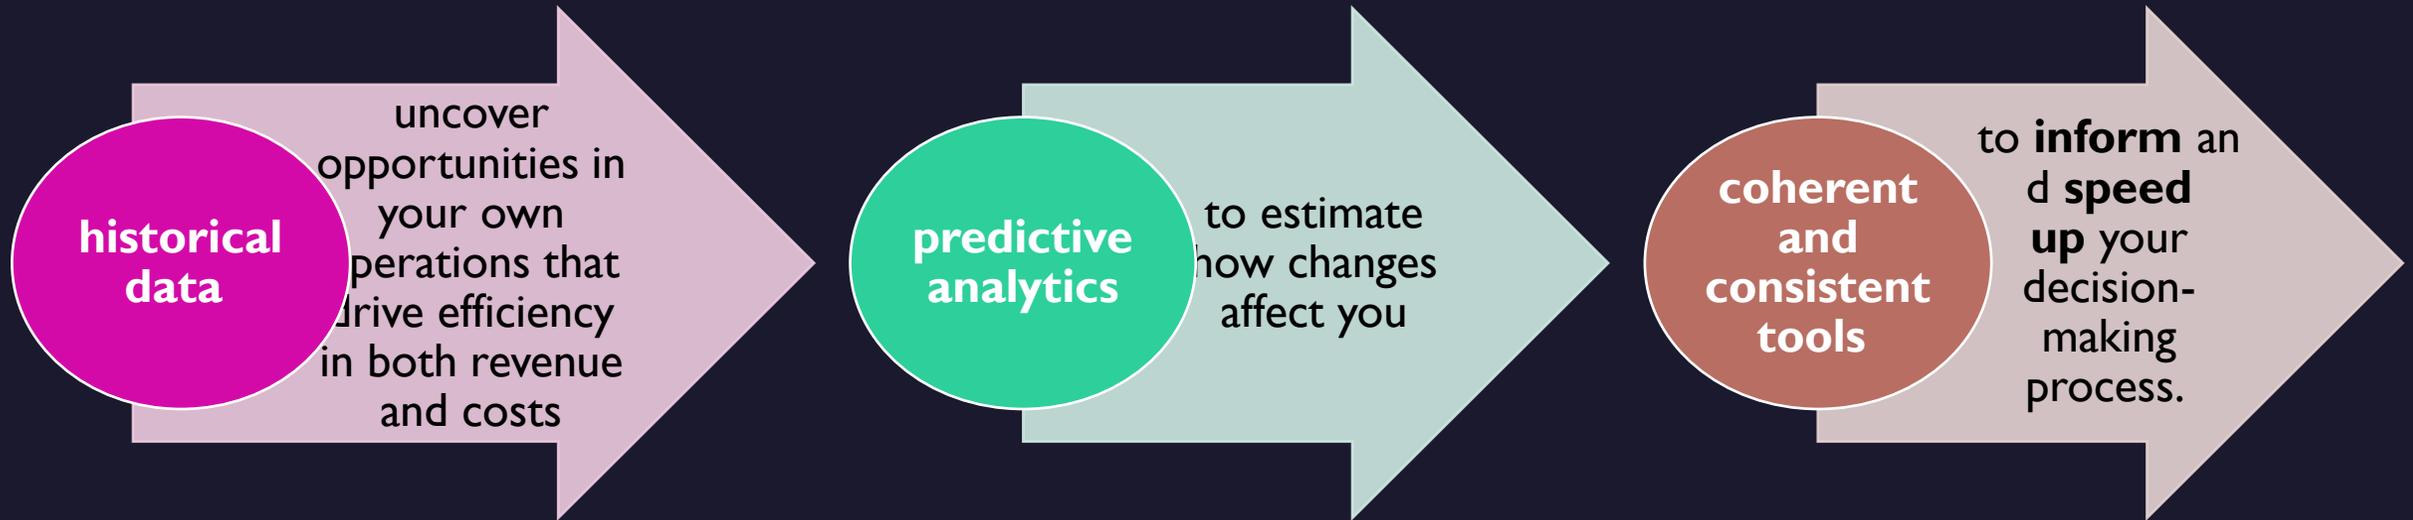

Better understanding of customers

Competitive advantage

Business Intelligence Process

Descriptive Analytics

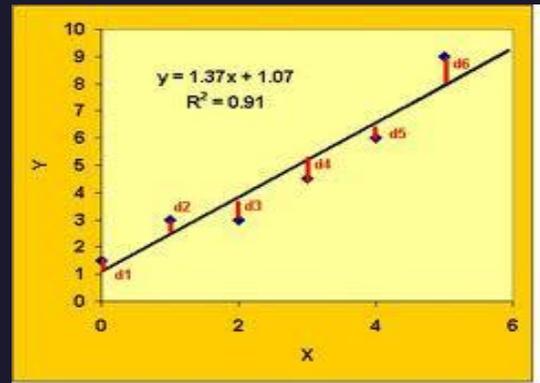

Year 2000				
Line Items	Audio Division		Video Division	
	Budget	Actual	Budget	Actual
Cost of Goods Sold	\$6,861,006.48	\$7,132,961.38	\$4,322,514.74	\$4,526,954.71
Marketing Expense	\$750,179.20	\$756,596.17	\$455,048.05	\$462,815.40
Research and Development Expense	\$538,243.39	\$538,014.73	\$329,890.95	\$336,808.13
Selling Expense	\$1,632,921.64	\$1,579,790.18	\$986,887.49	\$927,970.90
Taxes	\$314,659.05	\$319,390.19	\$202,636.67	\$200,205.01

Year 2001				
Line Items	Audio Division		Video Division	
	Budget	Actual	Budget	Actual
Cost of Goods Sold	\$2,554,556.31	\$2,700,773.16	\$1,726,031.16	\$1,773,448.08
Marketing Expense	\$294,766.22	\$290,696.70	\$187,757.29	\$176,778.55
Research and Development Expense	\$200,719.90	\$193,236.83	\$134,270.95	\$125,725.88
Selling Expense	\$620,427.30	\$611,649.47	\$405,092.93	\$400,181.91
Taxes	\$130,926.70	\$122,526.31	\$82,450.76	\$80,671.87

What has occurred?

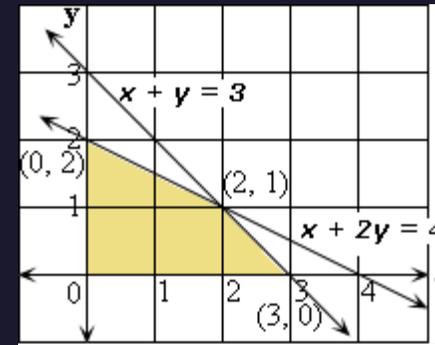

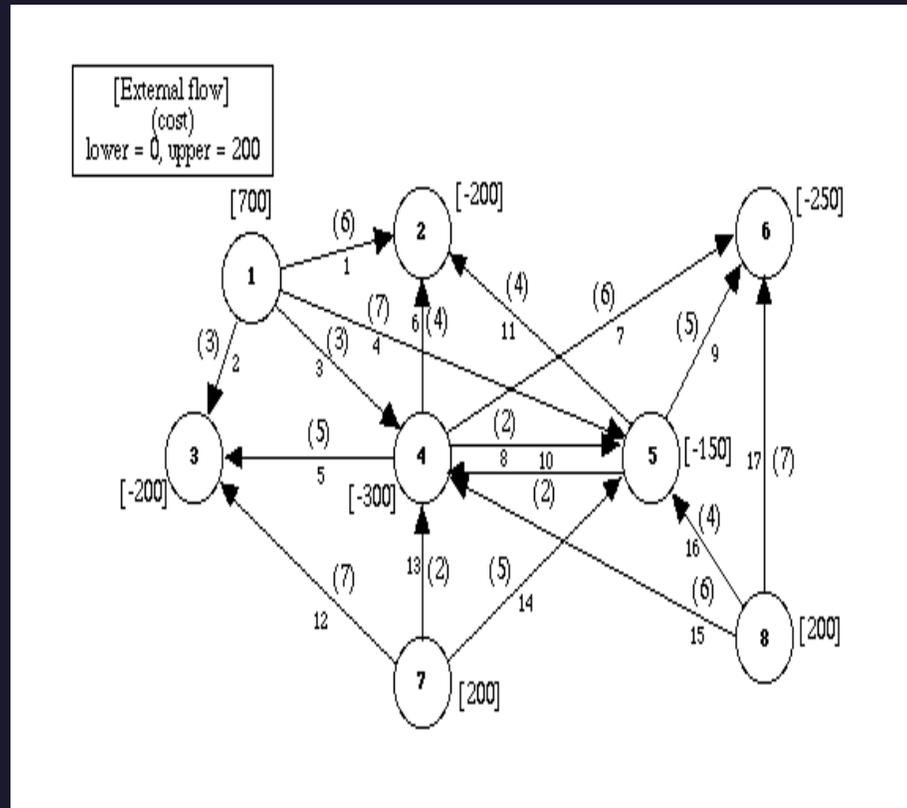

Predictive Analytics

What will occur?

The screenshot displays the SAS Enterprise Miner interface. On the left, a 'Properties Panel' is open for a 'Create Time' node, showing details like 'Create Time: 10/5/07 2:34 PM' and 'Last Status: Time this node was created'. The main 'Diagram Workspace' shows a workflow: 'Home Equity' -> 'Impute' -> 'Data Partition' -> 'Decision Tree' and 'Regression' -> 'Neural Network' -> 'Model Comparison'. A 'Diagram Navigation Toolbar' is visible at the bottom right of the workspace.

Prescriptive Analytics

What should occur?

Business Intelligence vs Business Analytics

Business Intelligence

- Deals with *what* happened in the past and *how* it happened leading up to the present moment.
- It identifies big trends and patterns without digging too much into the *why's* or predicting the future.

Business Analytics

- Deals with the *why's* of what happened in the past by breaking it down into contributing factors.
- It uses these *why's* to make predictions of what will happen in the future.

Business Intelligence vs Business Analytics

	Business Intelligence	Business Analytics
Descriptive analytics: Creates summary of historical data to visualize	✓	✗
Diagnostic analytics: Determines the source of issues discovered by Descriptive analytics	✓	✗
Predictive analytics: Makes predictions based on collected data	✗	✓
Prescriptive analytics: Offers solutions for issues found by descriptive analytics	✗	✓

Importance of Data Driven Insights in Effective Decision Making

HIS HELICOPTER MUST BE OPERATED IN COMPLIANCE WITH THE OPERATING LIMITATIONS SPECIFIED IN THE APPROVED HELICOPTER FLIGHT MANUAL.

MINIMUM COCKPIT WEIGHT 170 LBS.

SELECTIVE PASSENGER LOADING

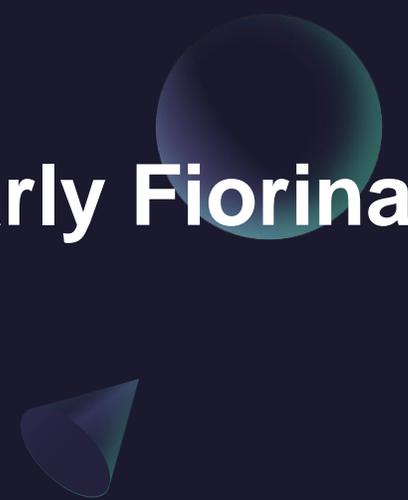

WHEN BOTH CREW SEATS ARE OCCUPIED ONLY ONE (1) MID PASSENGER IS PERMITTED UNLESS THERE ARE TWO (2) AFT PASSENGERS.

WHEN ONLY ONE (1) CREW SEAT IS OCCUPIED NO MORE THAN TWO (2) AFT PASSENGERS ARE PERMITTED UNLESS THERE IS ONE (1) MID PASSENGER.

ABOUT 4,250 LB GV ALTERNATE PASSENGER LOADING FROM 500 TO 5000 POUNDS TO MAX HEIGHT AND BALANCE FOR TRAINING OPERATIONS.

The goal is to turn data into information, and information into insight.

- Carly Fiorina

A decorative graphic consisting of a blue sphere and a blue cone. The sphere is positioned above the cone, and both are rendered with a gradient from dark blue to a lighter, teal-like blue.

Customer first

Data vs. Gut

Identify pattern

Any Guesses?

**Information is the oil of the
21st century, and analytics
is the combustion engine.**

- Peter Sondergaard

Data will talk if you're willing to listen!

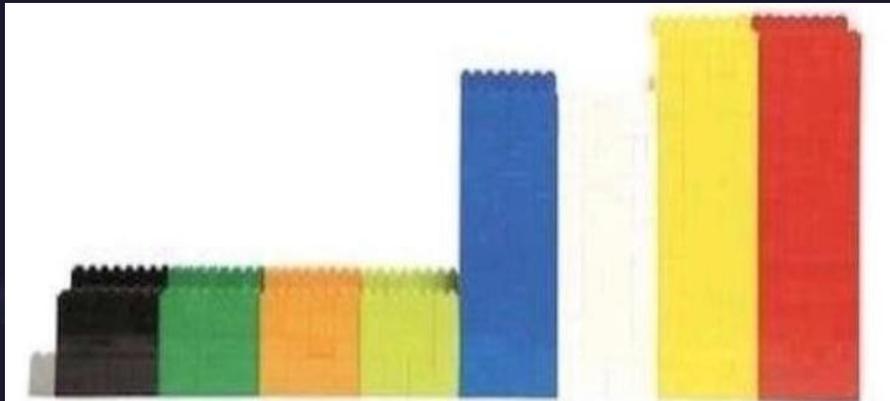

Step 1

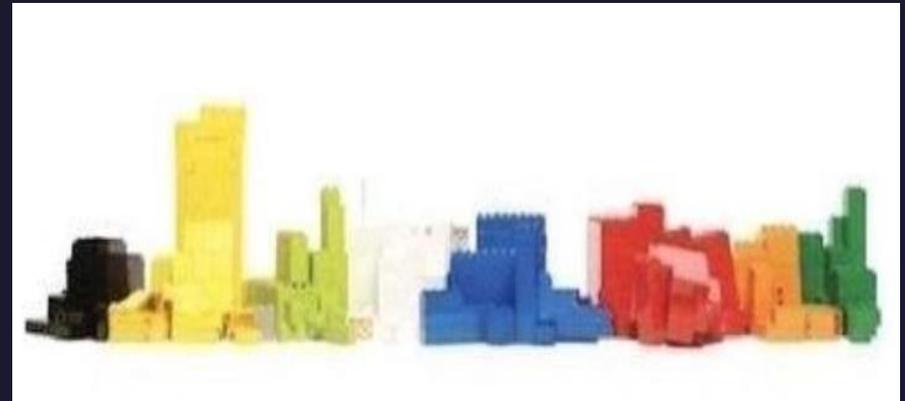

Step 2

Step 4

Step 3

Hypothesis

- Dummy data that talks about a bank's customers
- Tool used: Power BI
- 4 steps to represent our data and analyze
- Unfolding the advantages of Data Driven Insights

Step 1: Understanding the data

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
1	Customer 1		Customer 2		Customer 3		Customer 4		Customer 5		Customer 6		Customer 7		Customer 8	
2	Balance	Age														
3	\$10,000	20	\$20,000	30	\$30,000	40	\$40,000	45	\$50,000	50	\$60,000	55	\$70,000	60	\$80,000	70

Step 2: Re-arranging the data

	A	B	C
1	Customer Name	Balance	Age
2	Customer 1	\$10,000	20
3	Customer 2	\$20,000	30
4	Customer 3	\$30,000	40
5	Customer 4	\$40,000	45
6	Customer 5	\$50,000	50
7	Customer 6	\$60,000	55
8	Customer 7	\$70,000	60
9	Customer 8	\$80,000	70

Step 3: Analysing the data

Geographical concentration

Distribution by Balance

18+

Distribution by Age

Distribution by Gender

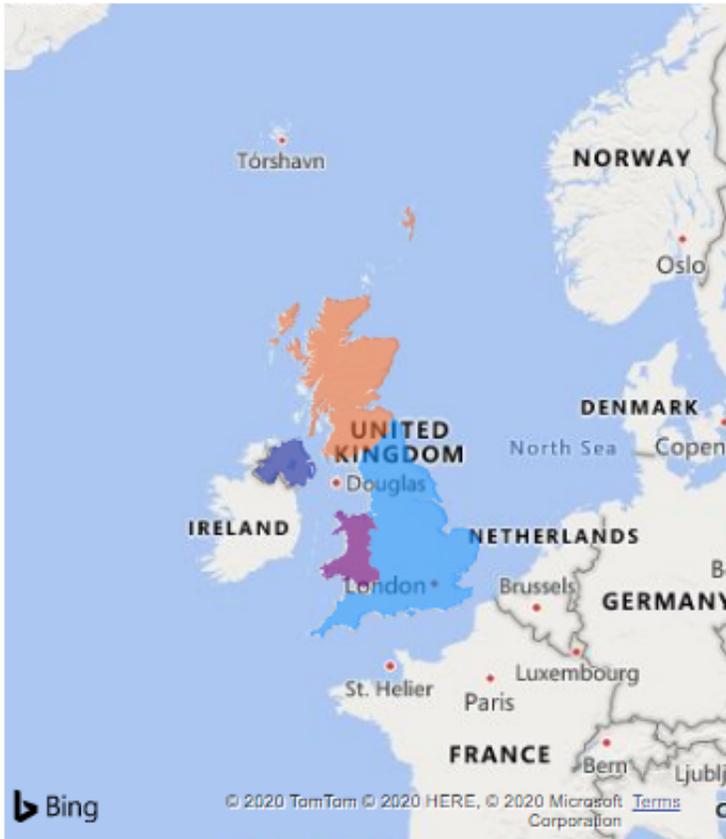

Distribution by Profession

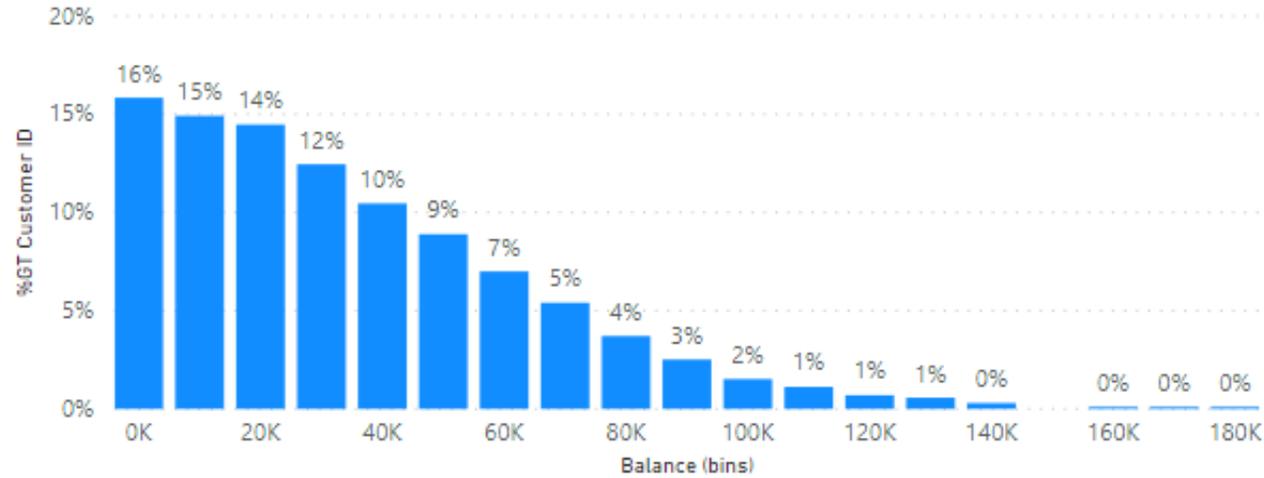

Step 4: Representation of data

4014

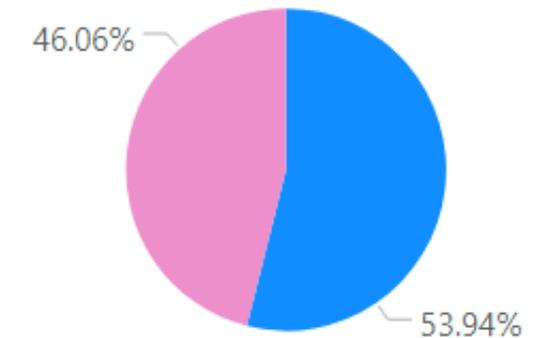

Region ● England ● Northern Ireland ● Scotland ● Wales

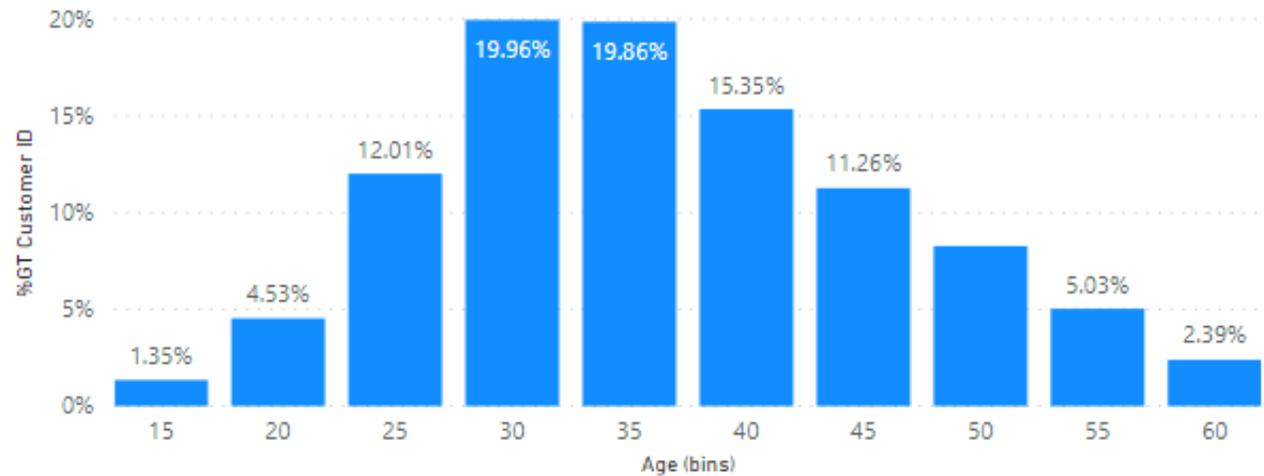

Distribution by Account Balance

Gender

Distribution by age

Job classification

Act today for better results tomorrow

Early View

- React in advance
- Act swiftly
- Plan better
- Mitigate risk

Customer first

- Changing customer needs
- Enhanced servicing

Data vs. Gut

- Dynamic environment
- Analysis vs. Instincts

Identify pattern

- Connecting the dots
- Understanding the linkages

Data visualization tools

Tableau

Power BI

Qlik BI

Ease of use

Very intuitive and user friendly (Non technical users can use easily)

User friendly – Knowledge of Microsoft Excel is enough

Easy to learn for people with Data Science background

Free version

Tableau Public is free, Tableau Server is licensed.

Desktop version is free, Power BI Pro is pay per month

Qlik Personal is free, Qlik Sense is paid

Advantage

Flexibility to create custom visuals gives it an edge

Inexpensive, complex visuals are easy to create

Provide deep range analytics and dataset support
