## **Ten Days Research Methodology Course for Research Scholars in Social Sciences**

### **About the Research Methodology Training Programme:**

Capacity-building on an individual level requires the development of conditions that allow participants to build and enhance existing knowledge and skills. It also calls for the establishment of conditions that allow individuals to engage in the “process of learning and adapting to change.” Research is a simultaneous process of thinking, studying, analysing, and writing. Social science research is characterised by diversity of theoretical perspectives, methodological strategies, data collection practices, and analysis techniques. This has made it always necessary to provide training and orientation on a continuing basis to young Research Scholars to equip them with methodological skills. It is a matter of concern; the underprivileged groups, such as SC/STs, are poorly represented in higher educational institutions. Moreover, Ph.D. scholars in the group lack the skills to maintain sustainable, high-quality academic standards due to inadequate skill-building exercises. To address this issue, marginalised groups require capacity building in research and other academic activities. In India, most Ph.D. scholars face difficulty finalizing their Ph.D. thesis and presenting their research in a presentable form. Though the newly initiated pre-Ph.D. Coursework by UGC has provided orientation to Ph.D. scholars. The research scholars are always in a dilemma about how to write different components of Ph.D. work, i.e., synopsis, thesis, summary, and research articles, which are mandatory for completion of a Ph.D. work. Therefore, any researcher must be well-equipped and have control over the research methodology and techniques. The Centre for Informal Sector and Labour Studies (CIS&LS), JNU, is organising a **Ten-Day Research Methodology Course for Research Scholars in the social sciences from April 20th to 29th, 2026.** This Research Methodology Course is sponsored by the Indian Council of Social Science Research (ICSSR), New Delhi. The Course will include various aspects of research methodology and techniques used in the field of social sciences.

### **Objectives of the Training Programme:**

- The aim of the course is to improve the methodological and writing skills of the Research scholars and develop their potential as future academicians/social science researchers.
- The main objective of the workshop is to provide the research scholars with a set of skills and potential to commence the research in the field of Social Sciences very effectively, so that the students can give the output of their research in a high-quality published work.
- The other important objective is to educate the participants on the use of statistical techniques in data analysis in the field of social sciences and to provide practical/hands-on experience for their Ph.D research work, with an introduction to basic software knowledge for data Analysis.

### **Brief summary of Course content:**

The course will be conducted in both lecture and interactive modes. In addition to the interactive classroom lectures, the participants will also be introduced to how to use the software like SPSS and STATA for data analysis. The contents of the course are:- (1) Meaning, Objectives & Types of Research, Research Approaches, Problem identification and formulations of Research Question; (2) Research Design, Selection of research topic, Review of Literature; (3) Concept and history of fieldwork, Stages of fieldwork – selecting a research setting, gaining access, (4) Observation and Case Study, Concept and types of interview, Survey Method and Sampling, Basic Quantitative Analysis, (5) Qualitative and Quantitative Research, Ethics in Social Science Research, (6) Academic Writing, Papers for Journals, Preparation of Reports. (7) Ethics in Academic Writing, Methods for Avoiding Plagiarism, (8) Structure of Paper, Report, and Book, Elements of writing, e-library training (9) Research Proposal, writing a research proposal, field visit & data collection; (10) Analysis of data using SPSS and STATA software.
